	1710C Backhoe	* MSRP: see dealer
	<p>Overview: Heavy-duty buckets with formed cutting edges and 3 horizontal wear bars. Mahindra's formed console gives unit a modern appearance and greater comfort to operator. Covered by a 2-year limited warranty.</p> <p>Note - Instruction: Unhook the sway links from the rear axle brackets and remove 3 point hitch lower link arms, the sway links and the top link. This will prevent damage to tractor and backhoe.</p>	

- Backhoe valve is positioned low to operator; this allows less heat and noise to be transferred into operator's area
- Dedicated hydraulic valve with dual axis levers
- Formed console gives unit a modern appearance and greater comfort to operator
- Heavy-duty swing frame
- High strength steel with double formed dipper arm
- SAE O-ring, Flat face O-ring, and JIC hydraulic connections are used to reduce potential hydraulic leaks
- Cushioned, orificed and port reliefs are designed into the swing cylinder circuit allowing for smooth operation of backhoe
- Double acting cylinders
- Heavy-duty buckets with formed cutting edges and 3 horizontal wear bars
- High back, comfortable seat
- Mahindra backhoes are covered by a two-year limited warranty
- Under frame Mounting System mounts to the center and rear end of tractor

TRANSPORT	
Boom Pivot Height	12"
Operating Weight w/ 12" Bucket (lbs.)	952
Overall Length	6' 7"
Transport Height (boom fully retracted)	9' 11"
Transport Width (stabilizers up)	5' 3"
OPERATIONAL	
Bucket Rotation	175°
Digging Depth (2 ft.) Flat Bottom	7' 8"
Digging Depth (8 ft.) Flat Bottom	6' 2"
Digging Depth Maximum	7' 10"
Digging Force - Bucket (lbs.)	1100
Digging Force - Dipper (lbs.)	2900
Loading Height	5' 3"
Loading Reach	4' 3"
Overall Operating Height - Fully Raised	10'
Reach from Swing Post	10' 7"
Stabilizer Down Below Grade	10"
Stabilizer Spread Operating Position	8' 5"
Swing Arc	180°
System Relief Valve Setting (PSI)	2050

Mahindra tractors are known to be built for the long haul, offering heavy-duty components, a heavier chassis and all-around superior performance. Mahindra backhoes are every bit as solid and reliable. Wherever, whatever, a Mahindra backhoe will dig in, and dig up, like no other. Highlights of the 3375 include a dual-cylinder swing with internal cushioning that provides maximum power where needed, decreases stress and increases reliability. This backhoe goes the distance, too, with an inline pressure filter and reverse flow check valve that insures longer valve life and less maintenance.

Specifications and design are subject to change without notice and without liability therefore. Whenever applicable, specifications are in accordance with SAE standards.
